MEMO No. 18

on the purchase of a round baler

Springfield May 19, 2026

To: Paul Smith, CEO, Romashka LLC
From: Ian Newman, Chief Mechanic

I request approval to purchase a round baler for haymaking.

The first hay cut is scheduled for June 10, with about 600 round bales 1.5 m in diameter to be made. Our current baler, built in 2009, broke down twice last season, and its repairs cost $2,380. The new machine is compatible with our MTZ-82.1 tractors.

The Purchasing Department has received two offers: $14,200 with delivery in 14 days and $13,200 with delivery in 6 weeks. The second offer would not arrive in time for the first cut, so I recommend the first one. Please instruct the Purchasing Department to place the order by May 26.
