MEMO No. 41

on replacing company cars

Springfield May 27, 2026

To: Paul Smith, CEO, Romashka LLC
From: Scott Swanson, Facilities Manager

I request approval to replace two company passenger cars.

The cars were built in 2014 and 2015 and have 148,000 and 133,000 miles on them. Their repair and maintenance costs were $4,290 in 2025 and have already reached $1,580 in the first four months of 2026. The insurance company has raised the premium for both cars.

I propose buying two new compact cars at no more than $32,200 each and selling the old ones. The estimated proceeds are $7,220 for both cars. Delivery of the new cars should not take more than 30 days.

Please instruct the Purchasing Department to request quotes from at least three dealers by June 10.
